

SASKATCHEWAN SWALLOWED UP G. J. NUCKLES

Body Recovered at Medicine
Hat Pumping Station
Yesterday Morning

IN WATER FOUR DAYS

Sad Ending to Real Estate
Man's Outing Shocks
Redcliff Associates

The body of Mr. Nuckles was recovered yesterday morning at the Medicine Hat pumping station and was taken to undertaking rooms in that city. No announcement has been made as to the funeral.

The swirling, treacherous water of the Saskatchewan river swallowed up George J. Nuckles, of Redcliff, last Sunday morning in a moment's time and terminated what was intended for a hot day's outing before it was scarcely started.

Mr. Nuckles, a young real estate man 29 years of age, member of the firm of Calderwood and Knuckles, was thought to be the most cautious man in the party, as he was repeatedly warning the others on the way to the river in Nuckles' automobile that every one should be careful and each should promise to not take chances on breast the swift current in the main channel.

On reaching the river and diving himself of his clothing Mr. Nuckles reiterated his warning and plunged into the water. A powerful swimmer and a sensible chap, Mr. Knuckles was supposedly the one to afford the last cause for worry. He struck out a few times and then flopped over on his back in the slower current near the shore of the island far from which the water had not recently receded.

A shout rent the air and Knuckles was seen to be in trouble. Calderwood and others dove in, but in the mean time Nuckles had been borne down the river by the swift current which soon engulfed him. He was never again seen. His companions could scarcely appreciate the fact that he was gone, and seeing the head and then the shoulders of a man appear above the river and then on seeing the bather draw himself up on the bank they were of the opinion that it was Nuckles, but it proved to be another man who appeared near the spot where Nuckles went down.

The body of Mr. Nuckles has not been recovered. The river where he went down turned and eddies so violently that he may have been caught in a large water hole or on the other hand may have been carried miles down the river. The Northwest Mounted Police at Medicine Hat were notified but were not equipped with a patrol boat or grappling hooks to assist in the search, according to those people who interviewed themselves in prosecuting a search. It seems to be the general opinion that after nine days should elapse in the water the body will appear on the surface at some point.

Mr. Nuckles was a man of splendid temperate habits and congenial disposition. He had made quite a little money here, having traded strictly to himself. An American by birth, Mr. Nuckles' history in the states and elsewhere could readily be ascertained by the wanderlust, as he had travelled in different sections, had pioneered in the remote regions of Texas where he had driven across hundreds of miles by team, had worked in California and other western states besides knowing Western Canada like a book, and at one time had drifted into the Yukon country.

Mr. Nuckles is survived by his mother, two sisters and two brothers. Both brothers were in the west this week to do what they could toward locating the body.

SASH AND DOOR FACTORY WILL MOVE ITS ENTIRE PLANT DOWN FROM CALGARY

Fine Points and Flaws Nullify
Some of By-Laws--Factories Safe

Due to technical errors made by the legal council employed by the city to draft several of the by-laws which are before the people—those by-laws are not properly constructed for passage and must be shelved. Mr. A. B. Clow, town solicitor, has advised the council to not go further with the \$21,000 industrial site and \$60,000 mill. Arrangements are being made whereby there will be no difficulty encountered in welding the agreements already entered into by the town of Redcliff as the first part and the several different factories already signed up.

COUNCIL MAKES APPOINTMENTS FOR SANITATION IN NICK OF TIME

Two Ensuing Months Bad Ones--Diligent Attention
Necessary--Industrial Bureau to Be Maintained--Fire
Hall Staking Error Adjusted.

Sanitary council measures and plans that have reached a stage such as to witness an immediate cleanup of Redcliff and a "kept-clean-up" condition through the efforts of a sanitary inspector appointed and an appointed sewerage. Four long hours of business and wandering over an error in alignment of the fire-hall building occupied the council's attention on Wednesday evening. The settlement of the sanitary committee was the most final and welcome result of the meeting.

Fred Cornell, one of the earliest residents in Redcliff, was appointed sanitary inspector at a moderate salary. The appointment was made contingent on the performance of the additional duties of tending to the city gas lights, or rather supervising them to report any broken or defective gas lights and to see to the repairing of them. There are 65 lights at present to be canvassed. These duties will be taken off of the shoulders of the sanitary inspector when his chief duties are interfered with by the lighting work. At the present time the council feels that there will be considerable spare time on the hands of the sanitary inspector which would be well utilized in taking care of the lights. The application of a Mr. Cook for the position was seriously considered and favorably so, but the council finally acted on Cornell's communication.

Mr. A. Faux was appointed city scavenger on a year's contract on an agreement of 60¢ per team-hour for the use of his teams, of which he is well equipped to carry on the work. The tenders for the scavenger work ranged from 50¢ to 75¢ per team-hour, but the council fell on Mr. Faux's proposal with the belief that he was better equipped to carry on the work than several of the others.

As several city bills were up for payment at the meeting, the firm of Hatch, Leander & Goode, contractors who erected the fire hall building and the local representative of the Lange Engineering Co., Mr. B. H. Graft, were in attendance to plead their respective claims or furnish of responsibility in connection with an error in the staking out of the fire hall whereby the present rear end of the building is skewed one foot and nine inches.

On this bearing carried out to the rear of the lot an extension of the structure would throw approximately six feet out of line. Fortunately the city owns the property on which it overlaps, which was made

Private Donation by Broughton and the Brick and Coal Company Cinches Good Industry Beyond Question--Due Here in Three Weeks.

Within three weeks, according to the statement made on Tuesday by Mr. A. W. Broughton, of Broughton Park, the Alberta Sash and Door Co., situated at Calgary, will dismantle its plant there preparatory to removal to Redcliff. The doubts have been closed without any negotiations with the city, as Mr. Broughton, in conjunction with the Brick and Coal Co., has donated a site to the company on the parcel of industrial sites adjoining the Brick and Coal plant.

The Alberta Sash and Door Co. is a concern that will eventually develop into a very large industry in Redcliff, as the construction and operations are snappily out in a certain volume of business for a long time to come. It has already under preparation the plans for 300 houses to be built in Calgary. The work and building work for all of these houses will be turned out of the Redcliff mill when it is completed.

The local plant will not be a branch of the industry. It will be the control and sole unit. The machinery in the present mill at

Calgary will be taken down and shipped to Redcliff. The machinery of this plant represents an investment of \$10,000. The building itself will cost considerably more than that. Mr. Broughton estimates that the entire factory will have cost in excess of \$25,000 by the time it is in shape for operation. The building will be fifty feet wide by a hundred in depth, two stories and of corrugated iron construction to overcome the vibration of such a plant; it will employ about twenty men to start.

The Alberta Sash and Door Co. is the second largest plant of its kind in Calgary. It is the reason for moving to Redcliff, is that the freight rates on lumber and the raw products from the source in British Columbia to Redcliff are no higher than to Calgary, while the saving in power here gives a decided manufacturing advantage to Redcliff. Construction of houses locally and outside should keep the plant working to capacity. This concern has under way fifteen houses in Medicine Hat at Crescent View at the present time.

LAUREL HOTEL OPENING WILL DRAW GREATER NUMBER OF THE TRAVELING PUBLIC City's Hotel Accommodations Now More Adequate for Volume of Business--New Hostelry Will Establish Name for Cooking

The new Laurel Hotel, a seventy-room house and as fine a one in most respects as there is in Western Canada, opened its doors to the public in Redcliff on Wednesday in a quiet way. In a week or so, however, the business and pleasure proprietors, expect to have a more formal opening.

The hotel, considered apart from its housing accommodations, is unequalled by any hotel west of Winnipeg. That is to say, the culinary department is par excellence, the authority being the chief dispenser of good things, Chef George McDonald. Mr. McDonald says that every device and idea for the perfection of the service and for the maintenance of sanitation in the kitchen and preparing rooms that is in vogue in the finest hotels in America is brought into play at the Laurel. And Mr. McDonald has reason to know, as he has been the employer of many of the finest hotels from the Atlantic to the Pacific.

Every morsel of food that goes before the guests of the Laurel Hotel will be prepared with the same care and skill as the food of the world. Down in the basement is where the pastry cook, Mr. Konig, of Winnipeg, will hold undisturbed sway. Here, with materials, kneading boards moving about, flour bins, etc., etc., and with a 100-lb. triple-deck flour sifter down beside him, he will turn out all the bread, pies, cakes, etc., that the chef calls for. He will be a private saint where the waitresses and others will have to transcend their errands over a counter to the door.

Turned out hot from the big oven, many of his products will be raised to a steam table on the first floor where they will be kept hot by heat piped from the basement, so that no flame comes in contact with the dishes after they are once prepared. The steam table has aluminum pans, trays and containers. Especial attention will be given by the hotel management to banqueting arrangements, for which the kitchen department is admirably equipped. With several downy beds, molds and designs for

OPERATED ON KEATS FOR APPENDICITIS

Redcliff Baker Goes Under Surgeons' Knives--Morphine Injections.

William Keats, the grocer and baker and one of the earlier residents of Redcliff, lies in a precarious condition in the hospital at Medicine Hat at the time of going to press with this paper and is sustained only by the alleviation of his pain by morphine injections.

Mr. Keats was taken suddenly ill during the night Tuesday and was rushed to the hospital Wednesday noon, where he was operated on and attended by Dr. Brown and Walle, of Redcliff, and Dr. Geraldine of Medicine Hat. The disease was diagnosed as an acute attack of appendicitis and was treated by the usual method.

FREIGHT WORK NEXT IN ORDER FOR HOME CARS

The Wall of Made-in-Redcliff
Two-Ton Trucks to Carry
Freight and Express.

60 FARES YESTERDAY.

Traffic Since Inaugural Trip
to Hat Week Ago Jumped
to Big Figure.

Mr. Wall of the Motor Works stated to The Review this week that the auto passenger service installed by the operation of the new bus turned out from his factory ten days ago is carrying capacity loads on some of its trips and carried a total of over sixty passengers to and from the Hat yesterday. On Monday the opening day, but only passengers were carried, but every day brings an increase.

A freight auto will probably go on the run to the Hat shortly. Mr. Wall has completed five large 4,000-pound machines whose powerful gear and construction will enable service to be maintained 365 days in the year. All that is lacking now to put on the service is a - machine, first inspected daily and with which the machines can be speedily equipped.

A customs broker in the Hat can be dealt with so that there will be no difficulty met with in releasing goods from bond. The installation of this service will mean overcoming a great inconvenience to merchants on small freight and express which will be carried on a pound rate.

The passenger service is as follows: Made-in-Redcliff Motor Bus service between Redcliff and Medicine Hat. Redcliff to Medicine Hat, 10:00 a.m. to 1:00 p.m. Medicine Hat to Redcliff, 1:00 p.m. to 4:00 p.m. Redcliff to Medicine Hat, 4:00 p.m. to 7:00 p.m. Medicine Hat to Redcliff, 7:00 p.m. to 10:00 p.m. Call at all principal hotels. Cash fare each way 50¢. Commutation tickets 10 rides 40¢. Packages not exceeding 60 lbs. in weight delivered in business district free.

Carnival Proves A Financial Success

The early session of two ornamental standards of clearer light in the town park, gifts of Mr. Geo. A. Lydall and Mr. H. O. Wheeler, will be the direct result of the financial success of Wednesday night's carnival given by the ladies of the Civic Improvement Society. Over \$100 net profit was made from the event, in which all Redcliff took part. Every booth of refreshments, all the cake etc. was sold out, so that the ladies have nothing left on their hands.

To the generosity of the "Atlas" Food Co., carpenters who worked overtime gratis, the Redcliff Band and the work done by Mr. Chas. New and others is due much of the success of the evening. The band played continuously from 8 p.m. till midnight, while dances were in progress on the open-air platform and crowds thronged the booths.

Drafting Plans for New Church

Conrad Mackenzie, of the firm of Pandey and MacKenzie, has been instructed by the building committee of the Presbyterian United Church to proceed with the preparation of the plans for the new building. They are already under way and will be completed and submitted to the congregation. Rev. Gordon could not attend consideration of the report of the United Church which would advance a sum of money for the construction of the new edifice.

LAUREL HOTEL OPENING WILL DRAW GREATER NUMBER OF TRAVELLING PUBLIC

(Continued from First Page)

the finest products the chef can turn out dishes for Mr. Epieure and his whole family. The seating capacity of the dining room is normally will be sixty, but for lunquets it can be nearly doubled.

The goal of utmost cleanliness is apparent throughout the kitchen and basement auxiliaries. Compartment wash trays enable thorough rinsing of dishes and separate compartment will keep the pots and kettles apart. The kitchen equipment, including the canopy range and steam table and the heating plant, etc., is the product of the Gurney-Oxford Co., of Montreal. One innovation in the Laurel Hotel, a small thing but a great convenience, is a large tea canister that regulates the portions for each pot to economize by simply giving it a twist. All the pots for a meal could be apportioned in a couple of minutes. It is entirely new to the West—has never been introduced before. Another kitchen labor-saver is a high potato masher that works with double handle bars. Double half screen doors lead to the basement branches where all the bread will be baked in Pullman-car pans in the tiled, asbestos-lined oven. A large rough-wash room is the employee's eating place. Here the vegetables etc., will be pared and made ready for cooking.

In back of this room are the Bohn refrigerators. These cooling rooms are the latest in refrigeration. Mr. Janineau, on taking a Ruvner representative through on Tuesday evening, picked up half a dozen matches which had been "refrigerated" for two weeks and on the ordinary friction they ignited, as even is the process of cooling and circulating evaporation. By deflecting the cool air upward through slats, or rather by drawing the warm air downward to melt it, the consequent cool air circulates downward and with the assistance of outdoor vents reduces the sweating and precipitation to a minimum. All meats, etc., will be kept in this department.

A food-stores room is the management's protection and check on the daily profits, even to a meal, of the dining room service. This room will be under lock and key and every pound of supplies taken from it must be accounted for by a check on the report. The chef will submit nightly a statement to the managers, which by the daily process of noting the increases and depletions in the stock will give them what will practically constitute a daily inventory. In this food store room is a potato bin on the hopper style with ventilation underneath to obviate spoilage. The potatoes are drawn from the

bottom so that they are used evenly.

Going back upstairs to the dining room we find an attractive room with wainscoting of Washington fir, tables with brand new linen and silverware etc.

Upstairs are to be found seventy guest rooms in all, thirty-four rooms on the second floor and thirty-six on the third, all furnished in mission oak with fresh bed linen and curtains. The latest fire alarm system has been installed with automatic connections in every room which are set off by smashing a glass and touching a button in a case on each floor.

On the second floor is a ladies' parlor which will be furnished with heavy lounges, mirrors etc. The staircase is the most attractive part of the hotel. It is finished in highly polished Washington fir, the work of Mr. Judy Olsen, the contractor, who also turned out an octagonal box setting for the dazzling Wellbach Reflex-20 stair light that lends an artistic touch.

The lobby will be brilliantly lighted. Off of the lobby is a wash room that is solely such. The plumbing throughout the building was installed by Adelt and Bailey, the local firm.

The lobby is wainscoted in the same style as the dining room and on one side a private office has been partitioned off.

Once more at the door after a tour of inspection of the hotel the observer's sum total of impressions stamps that of cleanliness and perfection in the culinary branch of the house most indubly in his mind, and in that department the management will endeavor to excel.

THREE STORY BLOCK FOR THIRD STREET

D. H. Sykes is Building For
Regina Man on Lot South
of Broadway.

Mr. D. H. Sykes, a local contractor, has been awarded the construction of a three story building on the west side of Third Street, south of Broadway, to be built for Mr. A. F. Ware, of Regina. It was through Mr. Sykes efforts that Mr. Ware was interested in Redcliff. Mr. Ware was in the city about three weeks ago, but at that time was not just certain what his plans would be.

The building will be solid brick for three stories and will cost in the neighborhood of \$12,000. It will be on the same lane as the Empress Theatre. The uses to which the building will be put are not known at present.

Red Light Preserves Milk.
 Interesting experiments recently have been made concerning the influence of red light on milk. That light is detrimental to the conservation of milk has long been known, but which of the rays did the mischief has not been determined. The red rays are beneficial, while those coming toward the violet side of the spectrum cause the milk to turn. Pure, fresh milk placed in an uncoloured glass bottle in the full sunlight and sterilized and pasteurized milk, placed also in uncoloured bottles in the same place were found at the end of the day to be completely spoiled and unfit for consumption. Absolutely no difference could be detected between the ordinary "fresh" milk and that which had been sterilized—both were equally bad. But if even unsterilized milk is placed in red bottles or in a bottle wrapped in red paper in the full sunlight it keeps perfectly good for several days.

Pasteurized or sterilized milk costs rather more but it is many people give the preference, as it is considered more hygienic. Now, however, that experiments have proved how easily even this pure, sterilized product can be spoiled by the influence of light, it may soon be expected that every dairy will adopt red bottles. A small sufficient quantity of such shall have been manufactured the bottles will be wrapped in red paper.

Health Lesson From Canal.
 Broadly speaking, we employ a physician only after illness occurs, and by this policy the per capita cost for this mode of health maintenance reaches a large annual expense. In comparison with disease curing, disease prevention, as demonstrated in the Panama Canal zone, has astonished the world. British and American authorities have made that former hotbed of disease more healthful than the most favored American community. This feat has been accomplished at a cost of a penny a day for each resident of the Canal Zone.

This achievement alone is worth more than the immense cost of the canal construction to the American people. No longer need any hot or malarial regions allow disease-brooding infections to prevent health and prosperity from being the normal condition of the community.

What has been done in the canal zone will be much more difficult to put into practice in all southern territory of America and tropical countries elsewhere through the world. Particularly our southern states can profit by introducing the new health regime and make greater safety for their own residents and neighbors from the northern states who are now prevented from going south through fear of unsuitable conditions.

Why, Charlie, you are not afraid of the dark, are you? No, I'm not afraid said Charlie. I'm not very fond of it.

Sticking to Facts.
 A lady had a new maid, who appeared at the door of the library one afternoon, where her mistress was reading. There's no coal maid, said the maid, and the fire is going out. No coal, cried the mistress in surprise. Why didn't you tell me before? I couldn't tell you there was no coal, m'am, replied the girl, when there was coal.

Wicked Anthon.
 The late Sir W. V. Gilbert was inclined to be a bit at the expense of the men and women who like to do water acting in the name of charity. An old maid, he said to him, Mr. Gilbert, what do you think of our amateur club? I think they are not so much a club as a bundle of sticks, returned the master of royalties.

A boy who was passing the shop thought he had found a job at last when he saw a sign in the window. Boy wanted. He went in and asked the proprietor about it. Yes, said the storekeeper. I want a good, bright boy to be partly indoors and partly outdoors. That's all right, said the applicant, but what becomes of me when the door slams shut?

The late Judge Silas Bryan, the father of William J. Bryan, once had several hairs stolen from his comb. He missed them at once, his maid told him about it to a neighbor. A few days later a neighbor came to him. Ray, judge, he said. I heard you had some hairs stolen. Either tonight, or, you pulled the judge very considerably, but don't tell anyone. You and I are the only ones who know it.

Editor—Who was the first hamster? Author—I really don't remember. Editor—I thought you might. You have been living in it, I hope.

Let me congratulate you, Mrs. Thompson. That's a beautiful little boy you have there. Oh, I don't think so, Mr. Jones. You don't? I'm sure you do. Let me see your son. Why don't you think so? Because he's a beautiful little girl.

The guest glanced up and down the Mill-dale without evaluation. Oh, well, he decided, finally, you may bring a damn fine system. The colored waiter became all apologetic. Ah, very sorry, but we're out of all appliances, excepting this.

Miss Plutonium—That horrid Mrs. Brite actually threw a glowing bomb at the signposts shop, I could not believe a thing you said. I'm afraid I'm a bit of a blunderer. You haven't the face to have you, dear?

Henry Miller's Apt Answer
 Henry Miller, the noted Canadian actor-manager, who recently played the "Rainbow" in Canadian, etc., is rather keen in repartee, and a number of his friends had evidence of it recently during a discussion with the actor on the question of woman and stage.

Do you think the vote would make women masculine? Inquired one man in the party.
 No, I don't think it would, replied Mr. Miller. In fact, we might say that it has failed to do that for some time.

Editor—Have you exhibited these poems anywhere else? Post—No, sir. Editor—Then where did you get that black eye?
 Use short words, they are the kind to use. I know, said the bespectacled husband, and this word—the blue you get in clogwings.

The combined area of the corn fields of the United States is nearly equal to the area of France or Germany.

Mexico's petroleum production last year was almost equal to that of all the previous years.

Practice
 How did you develop such a wonderful batting eye? asked the major league manager admiringly.
 Acting as health commissioner of Pennsylvania, Kan., replied the recruit modestly. I got so that I could throw a fly every time.

Mirrors' Luminant Cures Diphtheria

Barber (beginning the haircut)—Now you heard the story about the man that—(recounting business)—that short, sir? Customer (A tired actor)—Yes, a mere syringe will do.

The manager of a well-known luncheon company wrote to the proprietor of a theatre in a small town where his company was to appear: Would this to have a rehearsal at your theatre at three o'clock tomorrow afternoon, please, and have your stage manager, stage carpenter, assistant stage carpenter, property man, chief electrician, and all staff hands present promptly at that hour.

Three hours later he received the following reply: All right. —Jo will be here.

A burglar has turned poet. This is going from bad to worse.

No Escape.
 I thought that poor little henpecked man was going to take a sea trip for his health, but he's not. He's changed his mind.

Why not? He found out that through the wonders of wireless telegraphy his wife would keep in touch with him every day.

Corn and wheat disappear when treated with Holloway's Corn Cure without leaving a scar.

Mother—Oh, Bobby, you naughty boy, you've been smoking! (Pause). Poor, poor darling, do you feel very bad? Bobby (who has been well brought up). Yes, thank you; I'm dying.

You are ninepence years old. You—What are your rules for reaching such an unusual age? I dunno as I have any in particular. Just keep on living, and you'll get there, young man.

Kidder—That fellow makes a living writing light fiction. Kidder—He doesn't look like a literary chap, Kidder—He's not. He makes out statements for the electric light company.

NA-DROU-O! Headache Waters
 Stop them in quick time and clear your head. They are not counter-irritants, but they are the only ones or any other dangerous drug. 25c a box at your Druggist.

Progress
 A new idea from London states that a new play was received there with a marked view of appreciation. That sound suspiciously like a puff, doesn't it?

Barber—Hair's a bit thin on top, sir. Have you tried our hair tonic? Bald Man—No, that wasn't the reason.

Pater—I wish Harry's young man would come round after supper. Mater—That's all he does come after.

HOW THE CANADIAN PACIFIC RAILWAY CURES FOR THE PUBLIC & FOR THE MEN WHO ARE ON THE PUBLIC

DEMONSTRATION FARM STRATHMORE

COMMUNIST BUILDING

A citizen of the world wishing to spend a holiday at the heart of the Western Canadian Pacific Railway, the demonstration farm at Strathmore, Alberta, is a place of interest to all who are interested in the life of the West. It is a place where the public can see the results of the Canadian Pacific Railway's efforts to improve the life of the West. The farm is a model of modern agriculture, with the latest methods of cultivation and the best of the West's produce. It is a place where the public can see the results of the Canadian Pacific Railway's efforts to improve the life of the West.

PROTECTION FOR THE WORKERS.

The terrible factory fire in Blenheim, N. Y. brings back vividly recollections of the Triangle Shirt Waist Co. fire, the Iroquois Theater fire at Chicago and the General Store excursion boat fire at Hell Gate, New York.

After every fresh reminder the agitation springs up with the same flame and dies down with the last puff of smoke. Supposedly fireproof buildings with floor on floor of the seat of human freight go up in a puff like a powder magazine.

The United States, in her commercial frenzy, places the lowest valuation on human life of any civilized nation. Her railroad casualties make foreign statistics in comparison appear that toy roads are theirs; her mines are routinely discharging scores of seared bodies; and her factories are maiming the workers and burning them alive.

Canada should set a mark for self-protecting employees that will cause others to follow and not lead. Redcliff is small, but it takes a good many drops of water to make an ocean. We'll have a manufacturing town here and if all plants are built solid of the two materials of which she is now a factor as a producer in the building trades materials there will be no danger. It is up to the town to so regulate things.

THE INDUSTRIAL BOOTH.

Redcliff has five factories actually in operation, three that are practically completed and will be turning out products in eight weeks at the outside, one that is to move down from Calgary in three weeks and four or more that are jointly delayed by financial conditions and arrears in their agreements, which, happily, come at a time such as not to inconvenience or delay them for that alone. These additional four will probably all be under way by the first of the year. With the industries already here Redcliff will have four thousand population in a few months. Another thousand is easily acquired and before we realize it Redcliff will have a city charter with full city rights in negotiating for industries. Her resultant growth after that will be marvelous.

The enumeration of these industries and their products would make an aggregation of exhibits for the Redcliff Industrial Booth at Winnipeg that would double discount cities of several times the size of Redcliff, and the statement of Councilor Lydiatt on Wednesday that the booth represents money well spent and doing incalculable good is well put. It is not the residents of Winnipeg, but the strangers that come in contact with the booth and its products. It should be maintained as representative of Redcliff's place among cities of high industrial standing.

We certainly do want special meetings of the town council, as many and at such times as are necessary to transact the city business. If things come up that are urgent they should be handled accordingly. THE REVIEW has nothing but favorable comment for the council's spirit of digging in that has been shown of late.

The council's business-like, swinging active efforts along an investigation of, and decision on sanitary matters is what pleases the people. The council met on Tuesday of last week and after a lengthy discussion appointed a committee

to ferret into matters and that committee got busy early Wednesday and drafted its report in the afternoon, following a tour of inspection. The council weighed the report that night and voted an incorporation almost bodily of its provisions in a by-law and tenders were again invited. The intervening week has seen more actual cleanup work in progress than has been in evidence all summer. The by-laws are nearly ready and all to be done to make them read into the books as a city law is for the council to vote on them. Keep up the good work and give us a clean town (which includes politics, too.)

BREVITIES

R. J. Bott, secretary of the Board of Trade, left last Saturday night for Winnipeg and Regina.

Dr. and Mrs. C. H. Kohler and family returned Tuesday from four days' trip into the Canadian Rockies.

Mr. H. M. Sampson, manager of the Imperial Bank, has gone east on a two weeks' vacation trip.

The Redcliff Cafe has changed hands, some Greek restaurant men having bought out Capt. Wood.

Mrs. Charles Reed is the guest of Mrs. H. O. Wheeler at her home on Fifth street for the rest of the summer. Mrs. Reed is from Jeanes, Idaho.

A baby boy was born on Saturday night to Mr. and Mrs. Wilfred McKay of Redcliff.

Mrs. T. A. Hicks gave birth to a bouncing baby girl Tuesday morning. Mother and child are both doing well.

Quarry Lodge, A. P. and A. M., will hold a special communication next Tuesday night, commencing at 7:30 p.m. Work in the Fellowship degree.

Mrs. K. L. Lane and wife returned a couple of days ago from North Battleford after a two-days stay.

REDCLIFF - ALTA.

DO YOU BELONG?

If you like your own town best,
Tell 'em so!
If you'd have it lead the rest,
Help it grow!
When there's anything to do
Let the people count on you.
Strive for something big and new.
Make it go.

Buckle in and show your grit.
Earn a name!
If the other fellow's it,
Who's to blame?
Spend your money in the town
Where you pull the shackle down;
Work to give it just renovation.
That's the game.

If you're used to giving knucks,
Change your style;
Throw bouquets instead of rocks
For a while!
Let the other fellow roost;
Shun him as you would a ghost;
Meet him hammer with a toast.
And a smile.

When a stranger from afar
Comes along,
Tell him who and what you are.
Make it strong.

Needn't flatter never bluff;
Tell the truth—that's good enough;
Join the best—because they're the stuff
We belong.

Brick Go Through Fire
Before they Go to You.

They are made from clay and the clay is burned
in a heat that averages 2300 degrees Fahrenheit—a heat
far greater than any fire they will ever be called upon
to pass through in the walls of your houses.

This is what makes Brick Frost-proof.
That is what makes Brick Fire-proof.
That is what makes Brick Impenetrable.

Build Your Home of Brick—ITS ECONOMY

True economy not only takes in the first cost but
the cost that is to come. Brick houses of average
construction cost but a few dollars more than lumber
or stucco,—say \$150, on a \$3,500 house. But when they
are erected cost stops. There are no repairs to be
figured on. There is no painting to be counted in every
3 or 4 years. There is no depreciation in price,—con-
sequently your house will sell for what it cost you, plus
the increase of the value of your lot in the meanwhile.
There is a reduction in the insurance rate of 37 1/2 per
cent over concrete or stucco and more than 50 per cent
over lumber. There is a reduction in fuel bills because
brick keeps out the frost in winter. There is comfort
in summer because brick keeps out the heat. And
above all you can borrow more money from your bank
on a brick house ten years after it is constructed than
you can on a lumber or concrete of the same value in
the same period of time. When you build, build for
true economy.

BUT THE BIG ONE SLIPPED THE HOOK

**H. O. Wheeler Back From
Fishing—Great Crops,
Roads, Optimism!**

The lure of the singing reel and the wily brook trout held Mr. H. O. Wheeler, of the Realty Co., in the fastnesses of the Montana Rockies, for several days a week ago, where it is to be hoped that he forgot all about gas, industrial sites, debentures and by-laws for a while.

Anyway, Mr. Wheeler wore a real "Sunny-Jim" smile when he returned that would give one the hankering to have been along. He didn't say how many trout he uncorked and put into his basket, but his party must have eaten them all.

Mr. Wheeler left in a Cartier Roadster in company with Monte Woodcock, of the Redcliff Garage, and for the work of that machine Mr. Wheeler has nothing but words of praise. He says it took the hills like a charm and ran like a top all the way. Fine roads favored the travelers the entire trip, but particularly the first fifty miles south of Redcliff.

For 108 miles the course lay in Canada; thence they motored 42 miles in Montana to Havre, where Mr. Wheeler's brother, Mr. W. H. Wheeler, the leading merchant of Havre, joined them, whence they went into the Bear Paw mountains to lose themselves with rod and reel.

Mr. Wheeler of Havre returned with the party to remain in Redcliff some days. Mr. Wheeler, the Second, is rather reticent, but plainly appreciative of Redcliff's destiny. As urged in a little poetical outburst in another column, Mr. Wheeler believes in boosting his

home town, Havre, which, from all accounts, is a good, live, steady town. Mr. Wheeler was a passenger on the maiden trip of the new Made-in-Redcliff fourteen-passenger motor bus to the flat on Saturday and the weather being hot he must have absorbed considerable of the irresistible spirit that is the secret of Redcliff's progress.

But to make a short story long the crops are reported to be excellent all the way, clear into Montana, and the granaries will be bursting this fall, says Mr. H. O. Wheeler. The return trip was none the less enjoyable than the southbound lap.

PRAIRIE GAS

We came precariously near not having any gas at all this week. However, we weren't choked off for arrears. We've got a sub-franchise and it didn't cost us a durned cent.

That Maid-en-Redcliff auto bus on its maiden trip made a name for itself, but it looks to us like a case of Too Much-Maiden and not enough maidens. Fourteen fat and near fat men in a hermetically sealed conveyance on a day when the mercury is sky rocketing to Jupiter must have been too much for the ladies.

Mr. Wheeler got the fishing fever. Did you ever see a real estate man who wasn't a born fisherman? They are always angling with some tempting morsel as bait for us gullible mortals.

There were two crows hawking in the shade back of the Board of Trade Secretary's office the other day. It beats all what wonders publicity will accomplish!

Tom Hills called up central the other day and asked for the Royal Hotel at Medford. Has any one been watching Tom O'night's lately?

FINKLEMAN SAYS REDCLIFF LEADS

Mr. Roy Finkleman, who is erecting a mercantile store on Broadway adjoining Crowe's Hall, says that Redcliff has a more solidly progressive tone than any town between here and Winnipeg. He recently returned from the eastern city, where, he says, conditions indicate a greater lull in the trade market than in this locality. Ours in western Saskatchewan and Alberta look much more promising than in Manitoba.

Presbyterian Church.
"The Joy of Sorrow" will be Mr. Gordon's subject on Sabbath morning and his evening discourse will be a study of the Face of our Lord Jesus.

Public worship will be held in the Church at 11 a. m. and in the Empire Theatre at 7.30 p. m.

Sabbath School will be held at 2.30 p. m. and Bible class at 3.30 p. m. Prayer meeting is on Wednesday at 8 p. m. Ladies Aid meets on Thursday at 2.30 p. m., and the Choir at 5 p. m.

Redcliff Realty Co. Ltd

GAS IS TAPPED AT 1,175 FEET

The New Industrial Site Well Shows Heaviest Pressure of All.

Full pressure gas in a volume of 2,000,000 feet was tapped in the new industrial site well last Thursday and was capped during the week. The high pressure area was reached at a depth of 1175 feet. Mr. C. E. Duffield, who is in charge of the drilling, states that the pressure is equally as great as that struck in the well at the plant of the Dominion Glass Co. two months ago.

The gas was belching out with a roar and a blast sufficient to carry a stick of wood twenty feet in the air. That was last Sunday when a length of pipe was screwed on at the surface aperture to carry the escaping gas away from danger by contact with flame from any source.

Drilling progressed some feet into the shale below the gas chamber to punch down a sump hole to protect the intake of the pipe. No very great formations were encountered in the drilling, the core having proven mostly a loose clay and shale. The men in charge of the work see no reason why somewhere, sooner or later oil should not be tapped in this district. The formation is dissimilar to that in other gas regions, notably Tennessee, Kern County, California, Indiana and West Virginia, but in any of these fields where gas was struck first the discovery of oil followed at some later date.

A crude oil product in this district would create a new era of exploitation and in the opinion of several men, both connected with the local work and outsiders who are authorities and have been interviewed at a late date, there is every indication of oil obtainable at some depth in this district. The main body of oil will be found below the main gas chamber.

The addition of the new gas well is sufficient now to insure a supply ample for the present consumption. However it is understood that the tap will be kept on the ground to punch down still another well, the location of which is not definitely known, but will be somewhere to the east of the city. That will be the crew in the field until the autumn's industrial complex is evident.

*If the Films and Monopoles bother you go to Voell, the builder and get complete First Street and First Ave. N. Redcliff.

Employers of Labor should be protected by Liability Insurance. Let J. L. Landis & Co. write you a policy in a good strong company.

By-Law No.

BY-LAW OF THE TOWN OF REDCLIFF IN THE PROVINCE OF ALBERTA, TO PROVIDE FOR THE RAISING OF THE SUM OF ONE HUNDRED THOUSAND DOLLARS HEREIN TO BE EXPENDED IN CONNECTION WITH THE EXTENSION AND ENLARGEMENT OF THE MUNICIPAL SYSTEM OF WATERWORKS.

WHEREAS by By-Law No. 8 of the Municipality of the Town of Redcliff the Council was authorized and empowered to borrow on behalf of the municipality a sum of money not exceeding \$50,000.00 to be appropriated for the purpose of acquiring waterworks within the Municipality of WATERWORKS.

AND WHEREAS the Council in pursuance of said by-law did borrow a sum of \$50,000.00 and did acquire by purchase said waterworks.

AND WHEREAS the Council desires it expedient that the said waterworks should be extended and enlarged.

AND WHEREAS it is estimated that to acquire and extend the said waterworks there will be required the sum of \$100,000.00.

AND WHEREAS the municipality is authorized and empowered to borrow on the credit of the municipality at large for the purpose of extending and enlarging said waterworks.

AND WHEREAS the plan and specifications of the proposed system of waterworks and an analysis of the water for the purpose of ascertaining its quality and composition, under the Public Health Act, and a certificate has been obtained from the said Provincial Board of Health approving of the said plan, specification and water.

WHEREAS in order to carry into execution the said objects and to pay the annual amount of interest on the said municipal system of waterworks it will be necessary for the said Council to issue debentures of the Corporation of the Town of Redcliff for the sum of \$100,000.00 and the said Council has decided that the interest on the said debentures shall be a term of twenty (20) years and be secured at the rate of six (6) per centum per annum.

AND WHEREAS it is expedient to create a sinking fund for the payment of the said sum of \$100,000.00 and that the annual amount to be levied on account of the sinking fund shall be paid annually by the Secretary-Treasurer of the Town to the Provincial Treasurer.

AND WHEREAS there is required to be levied in each and every year for twenty (20) years the sum of \$8,000.00 to pay the interest on the said sum and the sum of \$2,500.00 to form a sinking fund for the payment of the principal money.

AND WHEREAS the amount of the whole rateable property of the said Municipality according to the last revised assessment roll thereof, is \$1,077,500.00.

AND WHEREAS the total existing debt of the Municipality outside of the debt for the current expenses of the year is the sum of \$124,000.00, no part of which is in arrears.

AND WHEREAS it is expedient that this By-Law should take effect on the day of its passing.

NOW THEREFORE THE MUNICIPAL COUNCIL OF THE TOWN OF REDCLIFF ENACTS AS FOLLOWS:

1. That it shall be lawful for the Mayor and Secretary-Treasurer of the said town to borrow on the credit and security of the town at large a sum or sums of money not exceeding the sum of \$100,000.00.

2. That the said sum shall be expended on the extension and enlargement of the municipal system of waterworks, and for the purpose of raising and extending the said waterworks, and for the purpose of paying the interest on the said debentures at the rate of six (6) per centum per annum, and the said debentures shall be dated on the day of issue thereof and shall be payable at the end of twenty (20) years, and that coupons shall be attached to the said debentures at the rate of six (6) per centum per annum, and the said debentures and coupons shall be made payable at the Royal Bank of Canada, Redcliff, Alberta.

3. That the said sum shall be expended on the extension and enlargement of the municipal system of waterworks, and for the purpose of raising and extending the said waterworks, and for the purpose of paying the interest on the said debentures at the rate of six (6) per centum per annum, and the said debentures shall be dated on the day of issue thereof and shall be payable at the end of twenty (20) years, and that coupons shall be attached to the said debentures at the rate of six (6) per centum per annum, and the said debentures and coupons shall be made payable at the Royal Bank of Canada, Redcliff, Alberta.

4. That the said sum shall be expended on the extension and enlargement of the municipal system of waterworks, and for the purpose of raising and extending the said waterworks, and for the purpose of paying the interest on the said debentures at the rate of six (6) per centum per annum, and the said debentures shall be dated on the day of issue thereof and shall be payable at the end of twenty (20) years, and that coupons shall be attached to the said debentures at the rate of six (6) per centum per annum, and the said debentures and coupons shall be made payable at the Royal Bank of Canada, Redcliff, Alberta.

5. That the said sum shall be expended on the extension and enlargement of the municipal system of waterworks, and for the purpose of raising and extending the said waterworks, and for the purpose of paying the interest on the said debentures at the rate of six (6) per centum per annum, and the said debentures shall be dated on the day of issue thereof and shall be payable at the end of twenty (20) years, and that coupons shall be attached to the said debentures at the rate of six (6) per centum per annum, and the said debentures and coupons shall be made payable at the Royal Bank of Canada, Redcliff, Alberta.

6. That the said sum shall be expended on the extension and enlargement of the municipal system of waterworks, and for the purpose of raising and extending the said waterworks, and for the purpose of paying the interest on the said debentures at the rate of six (6) per centum per annum, and the said debentures shall be dated on the day of issue thereof and shall be payable at the end of twenty (20) years, and that coupons shall be attached to the said debentures at the rate of six (6) per centum per annum, and the said debentures and coupons shall be made payable at the Royal Bank of Canada, Redcliff, Alberta.

7. That the said sum shall be expended on the extension and enlargement of the municipal system of waterworks, and for the purpose of raising and extending the said waterworks, and for the purpose of paying the interest on the said debentures at the rate of six (6) per centum per annum, and the said debentures shall be dated on the day of issue thereof and shall be payable at the end of twenty (20) years, and that coupons shall be attached to the said debentures at the rate of six (6) per centum per annum, and the said debentures and coupons shall be made payable at the Royal Bank of Canada, Redcliff, Alberta.

8. That the said sum shall be expended on the extension and enlargement of the municipal system of waterworks, and for the purpose of raising and extending the said waterworks, and for the purpose of paying the interest on the said debentures at the rate of six (6) per centum per annum, and the said debentures shall be dated on the day of issue thereof and shall be payable at the end of twenty (20) years, and that coupons shall be attached to the said debentures at the rate of six (6) per centum per annum, and the said debentures and coupons shall be made payable at the Royal Bank of Canada, Redcliff, Alberta.

9. That the said sum shall be expended on the extension and enlargement of the municipal system of waterworks, and for the purpose of raising and extending the said waterworks, and for the purpose of paying the interest on the said debentures at the rate of six (6) per centum per annum, and the said debentures shall be dated on the day of issue thereof and shall be payable at the end of twenty (20) years, and that coupons shall be attached to the said debentures at the rate of six (6) per centum per annum, and the said debentures and coupons shall be made payable at the Royal Bank of Canada, Redcliff, Alberta.

10. That the said sum shall be expended on the extension and enlargement of the municipal system of waterworks, and for the purpose of raising and extending the said waterworks, and for the purpose of paying the interest on the said debentures at the rate of six (6) per centum per annum, and the said debentures shall be dated on the day of issue thereof and shall be payable at the end of twenty (20) years, and that coupons shall be attached to the said debentures at the rate of six (6) per centum per annum, and the said debentures and coupons shall be made payable at the Royal Bank of Canada, Redcliff, Alberta.

11. That the said sum shall be expended on the extension and enlargement of the municipal system of waterworks, and for the purpose of raising and extending the said waterworks, and for the purpose of paying the interest on the said debentures at the rate of six (6) per centum per annum, and the said debentures shall be dated on the day of issue thereof and shall be payable at the end of twenty (20) years, and that coupons shall be attached to the said debentures at the rate of six (6) per centum per annum, and the said debentures and coupons shall be made payable at the Royal Bank of Canada, Redcliff, Alberta.

12. That the said sum shall be expended on the extension and enlargement of the municipal system of waterworks, and for the purpose of raising and extending the said waterworks, and for the purpose of paying the interest on the said debentures at the rate of six (6) per centum per annum, and the said debentures shall be dated on the day of issue thereof and shall be payable at the end of twenty (20) years, and that coupons shall be attached to the said debentures at the rate of six (6) per centum per annum, and the said debentures and coupons shall be made payable at the Royal Bank of Canada, Redcliff, Alberta.

13. That the said sum shall be expended on the extension and enlargement of the municipal system of waterworks, and for the purpose of raising and extending the said waterworks, and for the purpose of paying the interest on the said debentures at the rate of six (6) per centum per annum, and the said debentures shall be dated on the day of issue thereof and shall be payable at the end of twenty (20) years, and that coupons shall be attached to the said debentures at the rate of six (6) per centum per annum, and the said debentures and coupons shall be made payable at the Royal Bank of Canada, Redcliff, Alberta.

14. That the said sum shall be expended on the extension and enlargement of the municipal system of waterworks, and for the purpose of raising and extending the said waterworks, and for the purpose of paying the interest on the said debentures at the rate of six (6) per centum per annum, and the said debentures shall be dated on the day of issue thereof and shall be payable at the end of twenty (20) years, and that coupons shall be attached to the said debentures at the rate of six (6) per centum per annum, and the said debentures and coupons shall be made payable at the Royal Bank of Canada, Redcliff, Alberta.

15. That the said sum shall be expended on the extension and enlargement of the municipal system of waterworks, and for the purpose of raising and extending the said waterworks, and for the purpose of paying the interest on the said debentures at the rate of six (6) per centum per annum, and the said debentures shall be dated on the day of issue thereof and shall be payable at the end of twenty (20) years, and that coupons shall be attached to the said debentures at the rate of six (6) per centum per annum, and the said debentures and coupons shall be made payable at the Royal Bank of Canada, Redcliff, Alberta.

16. That the said sum shall be expended on the extension and enlargement of the municipal system of waterworks, and for the purpose of raising and extending the said waterworks, and for the purpose of paying the interest on the said debentures at the rate of six (6) per centum per annum, and the said debentures shall be dated on the day of issue thereof and shall be payable at the end of twenty (20) years, and that coupons shall be attached to the said debentures at the rate of six (6) per centum per annum, and the said debentures and coupons shall be made payable at the Royal Bank of Canada, Redcliff, Alberta.

17. REDCLIFF GRABS TWO EASY GAMES

Fewings Fall By Their Own Fumbles—Brooks By Red-cliff's Heavy Hitting.

After two weeks of inactivity on a malted milk baseball diet the Redcliff fans were treated to some sensational last week which don't need much printers ink to picture them again to those who saw the games.

The Fewings of Medicine Hat came up to make the local boys look like the most amateurish novices at the game, but they went back hobbling as if that shoe would fit their own feet. The final score in the game with the Fewings was 11 to 2, Redcliff, naturally, having the long end of it.

The score in the game would indicate a swiftest, but it is a misleader. The actual hits made by the Redcliff team in six innings of play numbered but three, one of which was a poor smudge hit on slow fielding. The Hat bunch did little better, having but five hits to their credit. The Fewings pitcher wouldn't let Redcliff hit. Those who reached first base and made the circuit did it on errors, being hit by pitched balls and free tickets. The first three innings of play were replete with errors by the visitors. Redcliff's big deluge of runs came in the first inning when seven men crossed the plate. The entire side was at bat and Reem faced the pitcher for a second time before the half was over. The Fewings unfortunately seemed to lose all control of themselves and their bad defeat can be attributed only to their own poor playing, although some of the umpire's decisions were a little questionable, but not as to affect the score.

The only error of the game on Redcliff's side was made in the fourth inning and were responsible for two runs. Reem let one slide through to left field and White dropped one in center field. Redcliff made two runs in both the second and third innings on errors solely. The looseness of play by the visitors makes a score sheet so ridiculous to print. Catcher Warren for the visitors was in the game every minute, but all of the infielders and particularly Don-brosky when at first base were booting the ball. Later Donbrosky took the pitchers box and tried a very fine game. The visitors were apparently badly out of practice and the game is an unfair gauge of their ability as they have put up very good ball earlier in the season.

THE BROOKS GAME.

The Brooks-Redcliff game on Saturday differed from the Fewings game in that the heavy score was piled up by good consistent hitting.

The final score was 13 to 7. Redcliff made three home runs credited to Reem, Peaceck and White. All of them were made with one or more men on bases. Redcliff made seventeen hits in all and only one error. Jones got three clean hits. Brooks fielded the ball well and were out-classed badly only by Redcliff's heavy hitting. Reem connected for what was probably the longest home run of the season.

The full nine innings were played and it was in the last four innings that Brooks did all of her scoring. The darkness in the last two innings made a hit safe wherever it landed.

UNCLASSIFIED ADS.

FOR SALE—Please apply to B. Burke, Sec. & T. 14, range 6, five miles northwest of Redcliff.

DR. STONER AND FAMILY RETURN

Dr. and Mrs. R. B. Stoner and their two sons, Robert and Donald, returned to Redcliff yesterday, after spending the past six months in California. When seen the doctor said he was glad to be back in Redcliff.

Miss Alice Woodcock, who accompanied them south last winter, also returned with them.

Western Money Is Freer Says Stepler.

That money conditions are fully as good in the West as in Eastern Canada is the opinion of Mr. Stepler, of the Royal Bank, who returned some days ago after a three weeks trip back east. Insurance companies have plenty of money on tap, he says, and are the only ones that will loosen up on good securities.

The plans for the new building of the Royal Bank are at the Winnipeg headquarters and may arrive in Redcliff any day. The building will be of solid brick construction instead of veneered as originally planned.

Police Court.

James Brumley brought a case against R. C. Peters in police court last Saturday charging the defendant with assault. Magistrate Henderson ordered Peters to pay the costs, whereupon the latter counter-charged Brumley for using obscene language. Brumley, in turn, was requested to pay \$3 and costs.

On Wednesday morning a case came up in police court of a woman named Mrs. R. C. Peters in Redcliff which revises the details of a like squabble a year ago at Stair, in which a Pole named Vallis received shotgun injuries which resulted in his death and the sentence of the murderer to twenty years imprisonment in Lehigh. In this case William Lotus, a section man on the C. P. R., charged Victor Rosalski with threatening to shoot him last Sunday. Rosalski was bound over on surety of \$200 to keep the peace for a period of twelve months. His surety was subscribed and he paid the costs of the case, including a Court Interpreter. Rosalski was implicated in the Vallis murder.

Anglican Dance Tuesday Night

A dance under the auspices of the Church of England will be held at the Empress Theatre next Tuesday evening, August 5. The receipts will go to the building fund of the church. Orchestra music will be provided and the ladies of the church will serve a supper in the late evening.

Redcliff Has 'Em On the Go

Mr. U. S. Grant returned Monday from a two-weeks' trip into Saskatchewan where he says that crops of every kind are as good as ever grown in the province. In spite of this fact, Mr. Grant says Mr. Grant.

that Redcliff is more active in the way of development and only relatively to size but in actual volume of work going on than the cities of Regina, Moose Jaw and Saskatoon. It is by all odds the liveliest town on the lines of the C. P. R., says Mr. Grant.
